## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application is in condition for allowance except for the presence of claims to an embodiment that was non-elected without traverse. Accordingly, claims 1-3 have been cancelled. It is the examiner's position that as now claimed, the invention of claims 1-3 is not generic to the elected invention and furthermore should be considered as patentably distinct from the elected embodiment due to explicit structural differences.

### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 1-3 are cancelled.

### ***Allowable Subject Matter***

3. Claims 4-7 are allowed.

Art Unit: 3676

4. The following is an examiner's statement of reasons for allowance: the prior art does not teach or make obvious the claimed invention as a whole. While components of the claimed invention are known in various arts for use in similar functions, it would require improper use of hindsight to combine those components and then also further modify those components so as to arrive at a device having all of the claimed structure and required arrangement presently claimed most particularly including a disc shaped rotatable upper magnet plate having positive polarity at one half and negative polarity at its other half that is attached to one housing part of an electronic device, and a circular lower magnetic plate also having positive and negative polarity halves attached to a relatively movable and opposed housing portion of the electronic device, whereby the upper magnetic plate can be rotated between positions 180 degrees so as to retain the housing of the electronic device either locked in its closed position or repelled towards an unlocked position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
